

Modules for managers

The European Asylum Curriculum offers two key modules at the managerial level, focusing on effective leadership within the asylum and reception systems. The Management in the asylum context module equips participants with essential skills for overseeing asylum procedures, ensuring efficiency and adherence to legal frameworks. Meanwhile, the Management in the reception context module addresses the complexities of managing reception facilities, with a focus on creating safe and supportive environments for applicants. Together, these modules help build the leadership capacity needed for managing asylum and reception processes within EU member states.

The European Asylum Curriculum offers 2 modules at managerial level, namely:

- Management in the asylum context
- Management in the reception context
