Latest Asylum Trends - November 2024

Definitions

Asylum applications include all persons who have lodged or have been included in an application for international protection as a family member in the reporting country during the reporting month.

EU+ refers to the 27 European Union Member States, plus Norway and Switzerland.

First instance decisions include all persons covered by decisions issued on granting EU-regulated international protection status (refugee or subsidiary protection) following a first time or repeated application for international protection in the first instance determination process.

Stock of pending cases includes all cases for which an asylum application has been lodged and are under consideration by the national authority responsible for the first instance determination of the application for international protection (until the first instance decision has been issued) at the end of the reference period (i.e. last day of the reference month). It refers to the "stock" of applications for which decisions at first instance are still pending.

The EU+ recognition rate includes EU-regulated forms of protection (refugee status and subsidiary protection) and excludes national protection forms (humanitarian reasons). It is calculated by dividing the number of positive first instance decisions (granting refugee status or subsidiary protection) by the total number of decisions issued

Country code glossary

This page is produced by EUAA's Situational Awareness Unit (SAU) based on monthly data exchanged under the Early warning and Preparedness System (EPS). The data shared with the EUAA by EU+ countries are provisional and unvalidated and, therefore, may differ from validated data submitted to Eurostat at a later stage under Regulation (EU) 2020/851. Trends analysed here focus on the top 20 citizenships applying for asylum in the focal month.
