Global patterns in international protection needs 2020

 Global patterns in international protection needs, 2020

5 countries account for 2/3 of the world's refugee population

The **COVID-19 pandemic** had a complex impact in creating or amplifying protection needs worldwide and impeding access to safety

Resettlement programmes came to near standstill due to travel restrictions during the COVID-19 pandemic

The pandemic provided the opportunity for countries to make further advances in **digitalisation** to increase efficiency in the asylum procedure
