2.1.3. Security incidents

The difficult and dangerous environment for media work and reporting in general has led to significant underreporting of security incidents in Sudan; as such this paragraph should be read in conjunction with section 1.1.4 Security incidents and civilian deaths estimates and section 1.3.2 Communication and media presence.

Among 1 610 security events (battles, explosions/remote violence and violence against civilians) recorded by ACLED in Khartoum state between 1 February and 30 November 2024, 627 were coded as battles, 846 as explosions/remote violence and 137 as violence against civilians. In 303 instances, civilians were the primary or only target. The city of Khartoum accounted for 34 % of the recorded security incidents, followed by Bahri (22 %), Omdurman (13 %) and Karari (12 %).633
