

## 3.3. Environmental activists

### 3.3. Environmental activists

Since the beginning of the full-scale war in Ukraine in February 2022, environmental activists remaining in Russia have become increasingly cut off from international networks and support structures.<sup>364</sup> As of 25 April 2025, 38 entities, 4 individuals, and 2 media outlets engaged in environmental activities were designated as ‘foreign agents’, with 34 of them being forced to close.<sup>365</sup> As noted by the UN Special Rapporteur, Mariana Katzarova, at least two entities and two individuals were added to the list of ‘foreign agents’ between 2024 and 2025.<sup>366</sup>

As reported by the Russian Socio-Ecological Union (RSEU),<sup>367</sup> in 2024, authorities initiated 5 criminal cases and at least 30 administrative cases against environmental activists. The source also noted that 72 environmental activists, 15 initiative groups, and 5 environmental organisations ‘faced pressure’ during 2024. These cases were recorded in 27 regions, with Moscow seeing the highest number (20), followed by Bashkortostan (16), Moscow region (10), Krasnodar region (8), Sverdlovsk region (8), and Arkhangelsk region (5 cases). Moreover, RSEU recorded 13 attacks on environmental activists, resulting in various types of injuries, and 5 cases of property damage.<sup>368</sup> The attacks on environmental activists often involved ‘private security or unidentified assailants.’<sup>369</sup>

In 2024, at least five new criminal cases were initiated against environmental activists;<sup>370</sup> in three of them, activists from Bashkortostan were charged with organising and participating in mass unrest and using non-lethal violence against an official.<sup>371</sup>
